EXPERIENCE

Java Developer

LTI Mindtree

📅 April 2021 – Present

📍 Hyderabad, India

- Actively involved in changing/testing to **scale up the application** to handle 200k transactions per request through **Akana gateway and fixed time-out issues**.
- Worked on Unit test coverage for legacy code and implemented Junit5 test cases for major modules with **coverage of more than 80%** and fixed critical vulnerability issues caused by **Log4j dependency for those modules**.
- Migrated the On-Prem MS SQL to the AWS by refactoring the Database module and TFS code base linked with Jenkins to GIT with commit history for Azure pipeline.

Angular Developer

LTI Mindtree

📅 Sept 2020 – March 2021

📍 Bangalore, India

- Developed a UI component from scratch to facilitate the inquiry functionality for the initiative of modernizing the legacy mainframe application leveraging the seamless user experience.
- Set up the Json server as a mock REST server for handling and providing the standalone customized responses by avoiding dependency on the actual server.

TECHNICAL SKILLS

• Backend

- Core Java, Java 8, Spring Boot, Junit 5, Mockito, Rest APIs, Maven, Hibernate, Gradle
- Docker , JSON server
- XSLT , XML

• Frontend

- HTML, CSS , Bootstrap
